Golden Valley Health Centers Reopens Renovated Le Grand Clinic

Le Grand, CA—Golden Valley Health Centers (GVHC) is proud to announce the reopening of its Le Grand Clinic following an extensive renovation project completed over the past year. Located at **13151 Jefferson Street, Le Grand, CA 95333**, the clinic will continue its longstanding mission of providing high-quality, accessible healthcare services to residents throughout the community.

For more than 20 years, the Le Grand Clinic has served local families and individuals by delivering essential primary healthcare services close to home. The newly renovated facility reflects GVHC's ongoing commitment to expanding access to quality care and investing in the health and well-being of rural communities across California's Central Valley.

The clinic serves as an important healthcare resource for the community, averaging more than 800 patient visits each month. Renovations included significant interior and exterior improvements, enhanced ADA accessibility features, upgraded patient care spaces, and expanded clinical capacity with more than 10 exam rooms designed to better meet the growing needs of patients and families.

"Reopening the Le Grand Clinic represents more than a renovation—it reflects our continued commitment to ensuring that every member of this community has access to high-quality, compassionate care close to home," said President & CEO David Quackenbush of Golden Valley Health Centers. "This investment allows us to better serve our patients with expanded capacity, improved accessibility, and a modern environment designed to support both comfort and quality outcomes for years to come."

The modernization of the clinic ensures that community members will continue to receive compassionate, comprehensive care in a welcoming and updated environment for years to come.

GVHC welcomes both new and returning patients and looks forward to continuing its long-standing partnership with the Le Grand community.
